

## T.E.L. WEEK '04

Technology Enhanced Learning is a challenging research topic where new technologies innovate traditional teaching and learning processes. This International Conference addresses different aspects of methodology and practice in vocational training, teaching and learning in schools and Universities, for regular and distant individuals with specific support for those with handicaps.

There are specific goals to be met in short time, such as a reduced students' drop-out in High-Schools and continuous learning opportunities for those not pursuing a University degree (**34% reported high-school drop-out and 77% not attending University after High-School reported in Province of Milan in 2002**).

TEL' WEEK 04 fulfils the need to improve Moenia and Extra-Moenia study, independently from the setting of learning, age and working or retired situation.

TEL'04 Conference will set the stage for dissemination of high-quality research results from EC sponsored projects to break learning constraints in space and time particularly in: pre-University study, University courses, Vocational training, retraining for new jobs, Third-Age continuing education.

TEL'04 EXPO è una opportunità di incontro fra chi opera nella Scuola e nella Formazione con dimostrazioni di realizzazioni e dibattiti sugli approcci adottati.

## T.E.L. EXPO 15-17 NOV. '04

Il programma delle relazioni e dimostrazioni è visibile su <http://www.tel04.org> dove è possibile registrarsi anche inviando un Fax al numero 02 50316241.

**La partecipazione è gratuita, ma occorre registrarsi.**
